

Method and System for Gift Delivery

Abstract of the Disclosure

A method for delivering gifts of predetermined size and maximum weight, according to the present invention, includes the steps of selecting delivery boxes, each box selected of the proper size for a gift of the predetermined size; providing
5 means for placing a proper delivery name and address on each box; affixing delivery indicia on each box of the proper denomination for the maximum weight plus the weight of the box for a given carrier; placing a purchased gift into a box of the proper size and having the indicia for the proper denomination; closing the box; placing a proper delivery name and address on the box using the means for placing a
10 proper delivery name and address; and delivering the closed box to the given carrier. A system, according to the present invention, for delivering gifts of predetermined size and maximum weight, includes selected delivery boxes, each box selected of the proper size for a gift of the predetermined size; means for placing a proper delivery
15 name and address on each box; delivery indicia on each box of the proper denomination for the maximum weight plus the weight of the box for a given carrier; wherein a purchased gift is placed into a box of the proper size and having the indicia for the proper denomination, and the box is then closed. A proper delivery name and address is placed on the box using the means for placing a proper delivery
20 name and address and the closed box is delivered to the given carrier. Both the method and the system work for CD jewel cases and DVD cases which hold one or two disks, as well as for other standard size gifts.
